| | 3.2 Street, Ninh Kieu Ward, Can Tho City |

Skill

JavaScript, Node.js, Express.js

Git, Github

Ability to continuously update technology

Ability to communicate effectively

Data analysis capabilities

Career goals

As a final-year student, my immediate goal is to secure a Junior Database Developer position to apply and expand my expertise in database design, optimization, SQL, and PostgreSQL/MySQL Performance Tuning within a real-world setting. I am focused on quickly mastering the team's data architecture to ensure data integrity and security, and significantly improve query and storage performance. My long-term aspiration is to evolve into a Senior Database Administrator (DBA) or Data Architect within 3-5 years, leading the design, management, and implementation of robust data strategies to drive significant technological advancements for the company.

Education

2022 - 2026

Can Tho University | Information System

GPA: 3.48/4.00.

Work experience

2025 - 2025

The Dariu Foundation | **Collaborator**

Participate in supporting teacher training in using Ai tools (GG App Script, NotebookLM, Make.com) in teaching.
